PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience architecting, developing, and deploying scalable web applications and high-performance microservices. Advanced proficiency across the full software development lifecycle using TypeScript, JavaScript, Next.js, React.js, NestJS, and Laravel. Proven track record of optimizing database queries, improving API response times by up to 40%, and automating complex workflows to boost operational efficiency. Dedicated to implementing modern software design patterns, clean architecture, and CI/CD best practices to build secure, enterprise-grade web solutions.

WORK EXPERIENCE

Software Engineer

Sep 2025 – Present

The Chapter • Remote

- Integrated and extended Moodle's APIs and web services, automating course management, user enrollment, and grading workflows—reducing manual admin work by 35%.
- Built scalable backend services with NestJS, delivering high-performance APIs consumed by Next.js frontends, resulting in a 40% faster response time and enabling seamless user experiences in Moodle-integrated applications.
- Designed optimized database query structures and session configurations to maintain 99.9% uptime across high-traffic learning management features.
- Implemented automated data synchronization across platforms, increasing data reliability and eliminating sync errors by over 90%.

Frontend Developer

Aug 2025 – Feb 2026

Yousen Tech • Mukalla, Yemen

- Built and optimized user interfaces with Next.js and Tailwind CSS, improving average page load times by 30% across scalable web applications.
- Integrated custom RESTful APIs with Odoo ERP, streamlining enterprise data exchange and reducing manual operational tasks by 25% through real-time automation.
- Re-architected front-end components to ensure 100% responsive design compliance across mobile, tablet, and desktop viewports.

Full Stack Web Developer

Jul 2024 – Aug 2025

Infinity Solutions • Mukalla, Yemen

- Architected and developed end-to-end full-stack web applications utilizing ASP.NET Core for back-end APIs and Blazor for interactive, component-based user interfaces across 2+ enterprise projects.
- Built high-performance Blazor WebAssembly / Server components, achieving full C# code sharing across client and server layers while improving UI rendering responsiveness by 30%.
- Collaborated with cross-functional teams in an Agile environment to deliver production-ready features 100% on schedule.

Backend Developer

Mar 2024 – Jul 2025

Ammad Digital Foundation for Information Technology • Remote

- Engineered back-end services and RESTful APIs using Laravel, supporting core business logic and seamless front-end integration for the Ammad project.
- Optimized Eloquent ORM queries, database indexing, and caching layers, enhancing query execution speeds by 25% under concurrent traffic.
- Implemented secure authentication protocols, role-based access control (RBAC), and custom API middleware to safeguard platform data.
- Structured modular Laravel architecture and clean code standards, reducing bug reports in backend services by 30%.

Full Stack Web Developer

Feb 2024 – Jun 2024

Bin Dowal Trading Group • Mukalla, Yemen

- Designed, developed, and maintained web applications across multiple group subsidiary companies, ensuring high availability and brand consistency.
- Coordinated end-to-end software tasks and code quality reviews, maintaining 100% adherence to internal technical standards.
- Refined UI/UX layouts and client-side rendering strategies, increasing user session engagement by 15% across primary corporate portals.

PROJECTS

Multi-Tenant Healthcare Platform (SaaS) Apr 2026 – Jul 2026

- Multi-Tenancy & MVP Delivery: Prioritized and delivered a high-performance MVP core using Laravel 11, PHP 8.3, and stancl/tenancy, ensuring absolute PostgreSQL/MySQL multi-database and custom subdomain isolation for diverse clinics from a single codebase.
- Full-Stack Web & Cross-Platform Mobile Suite: Built a real-time web administration dashboard using Next.js, TypeScript, and Tailwind CSS for clinical operations, alongside a unified patient facing mobile application using Expo (React Native) featuring family profile management and an automated FIFO waitlist system optimized via Redis
- Advanced Scheduling, Security & RBAC: Developed an atomic, conflict-safe booking engine with dynamic shift blocks, secured by Spatie Laravel Permission (RBAC) and Laravel Sanctum (OAuth2/OIDC), while enforcing immutable audit logs and strict PII data masking in system logs.

Corbit User's Interfaces 2022

- Developed and maintained Corbit frontend interfaces using Next.js, ensuring high performance and responsive, user-centric design.
- Enhanced UI/UX quality by implementing modern frontend practices and optimizing components for better usability and scalability.

Mukhlif Prize Dashboard May 2025 - Jul 2025

- Built a Prize Dashboard using Filament, providing an intuitive admin interface to streamline the management of competition seasons, participants, and winners
- Implemented key features such as season tracking, participant registration, winner selection, automated notifications, and data export, improving operational efficiency and communication

A3 Order System Feb 2025 - Apr 2025

- Built the A3 Order Management System to simplify, automate, and streamline the entire order lifecycle—from initial purchase to final delivery—enhancing operational efficiency and reducing manual intervention.

Ajr Platform Aug 2024 - Nov 2024

- Contributed to front-end development of the Ajr Platform, enhancing usability and performance to streamline car rental operations management and improve user experience.

EDUCATION

Bachelor in Computer Engineering

Hadhramout University

2018 – 2023

SKILLS

HTML · CSS · JavaScript · TypeScript · React.JS · Next.JS · Nest.JS · Laravel · Node.JS · Problem Solving · Database · Software Development

LANGUAGES

Arabic (Native) · English (Conversational)

CERTIFICATIONS

The Ninth Scientific Conference for Hadhramout University Students in the Natural and Applied Sciences section in the Computer Engineering, Technology and Information Systems group

Hadhramout University

Feb 2024

Best Project In Coding Bootcamps

Hadhramout Foundation

Sep 2023 - Jan 2024

Improving Capacities of Young People - Web Boot Camp

Hadhramout Foundation

Sep 2023 - Jan 2024
